18:00-18:10 O & A
18:10-18:20 Arne Wangel, DDRN: The DAAD (German DANIDA) alumni network
18:20-18:30 Survey: Needs assessment for future networking
18:30 Closure
Alumni of German higher education institutions are important partners for the German scientific community as well as the German economy. With the Alumni Special Projects the DAAD aims at supporting experts educated in Germany through furthering education and through providing opportunities to establish contacts with representatives of German science and economy at trade fairs and congresses.
Alumni Special Projects

1. Alumni participate in a one-week summer school and/or training course at a German university.
2. The participants attend a trade fair or congress in order to update their knowledge about the latest developments and technologies in their field of expertise.
3. Contacts with exhibitors and potential partners can be established.
Alumni Special Projects has so far focused on six essential topics:

Water
Food Security
Medicine / Health Management
Renewable Energies
Education / Lifelong Learning
Biodiversity

German higher education institutions apply to organize the summer school or expert seminar. Germany-Alumni (according to the DAC-list) can send their application to the selected institutions.
As a cooperation project the DAAD operates an internet portal that is also directed at alumni who have not received a scholarship from the DAAD or another funding institution. It offers a contact platform, an event calendar, a virtual job fair, and information on advanced training and networks.
"Jobs, assignments and proposals – the Alumniportal Deutschland is an ideal springboard for my career."

Job openings for Alumni
