

Student Internship with Danish Development Research Network communicating research targeting the UN SDGs – www.DDRN.dk – Spring semester 2019

Do you want to sharpen your skills as a science journalist working with the Sustainable Development Goals?

Danish Development Research Network (DDRDN) is currently mapping research on sustainable development by researchers from the Global South studying and working in Denmark, and by their Danish host institutions. DDRDN research communication performs critical reviews, encourage open access, and supports knowledge networking.

Danish Development Research Network (DDRDN) is a non-governmental organization. Membership is open to researchers, students, aid practitioners, consultants, private and public entities and others who are involved in the generation, communication and application of knowledge to support sustainable development in the Global South countries.

DDRDN is seeking 1-2 Research Communication Interns for 4 months during the Spring semester 2019.

You are studying communication, sustainable development, international development cooperation, or any other scientific field contributing to the UN Sustainable Development Goals. You have strong skills in written English.

You will work within one or more of these areas:

- **Document** research supporting the UN Sustainable Development Goals conducted by Southern researchers visiting Danish host universities
- **Map** research of Danish host universities, NGO and private sector knowledge communities with potential to support one or more UN SDGs in South countries
- **Review** current public programs and practices for research capacity building in South countries

The internship offers the opportunity to:

- Develop and sharpen your skills in science journalism
- Participate in staff training
- Join an extensive network of academics in Denmark and in South countries

Previous interns have taken the opportunity to contribute to current DDRDN newsletters and agendas, with their own ideas and understandings. DDRDN can therefore offer you the chance to think critically, and creatively, and to discover your own capabilities within the field of sustainable development.

The internship is unpaid; however, you may receive honorarium for authored posts published on DDRN.dk. You are eligible for SU and will have your internship credited as ECTS points at your institution of study.

Work Place: Dronningensgade 14, 1420 Copenhagen K. (Christianshavn).

The offices of DDRN are shared with a variety of other international development organisations. Thus, an opportunity to network and meet current practitioners within the field is offered.

Send your application to web editor Arne Wangel, PhD, Member of the Board of the Danish Science Journalists' Association, e-mail: info@ddrn.dk before **5 December 2018**.

We look forward to receive your application!
